

AYO, MOSES SUNDAY

SUPPLY CHAIN LEADERSHIP | MANUFACTURING MANAGEMENT

+447407393920

ayo.moses@gmail.com

Harlow UK

CORE COMPETENCIES

- Manufacturing management
- Project management
- Production planning & Production Management
- Material requirements planning and inventory management
- Quality management and internal auditing
- Energy Management

EDUCATION

HND in Mechanical Engineering 2012

Lagos State Polytechnic, Lagos, State.

ND in Mechanical Engineering 2005

Lagos State Polytechnic, Lagos, State.

NECO 2002

Barachel Model College, Lagos.

TRAINING AND CERTIFICATIONS

- Institute of Industrial Technology (Electro-Mechanical)
- City and Guilds of London Institute (Level 3 IVQ Technician Diploma in Engineering)
- NIIT (Advance Certificate in Information Technology)
- Industrial/ Oil Field Health, Society & Environmental Management Appreciation

Supply Chain Professional with a comprehensive background in manufacturing operations and leadership in the home and personal care Unilever business and over 14years of cross-functional experience in the supply chain. Results driven with demonstrated strengths to lead manufacturing operations for performance and initiate business-wide programs.

PROFESSIONAL WORK EXPERIENCE

UNILEVER. | Localization & 3rd party Manager

| 1st, Aug. 2023 |

Key Responsibilities:

Vendor Management: Oversee relationships with third-party suppliers, ensuring they meet Unilever's quality, cost, and delivery standards. Conduct regular performance evaluations and audits to ensure compliance with contractual obligations and company policies.

Contract Negotiation: Negotiate contracts and agreements with third-party vendors to secure the best terms and conditions, focusing on cost reduction, service quality, and long-term partnerships.

Risk Management: Identify and mitigate risks associated with third-party vendors, including supply chain disruptions, compliance issues, and financial instability. Develop and implement contingency plans to address potential risks.

Performance Monitoring: Implement key performance indicators (KPIs) to monitor and evaluate third-party performance. Conduct regular reviews and provide feedback to ensure continuous improvement and alignment with Unilever's objectives.

Cost Optimization: Work with third-party suppliers to identify opportunities for cost savings through process improvements, bulk purchasing, and other strategies. Track and report on cost savings achieved through these initiatives.

Key Achievements:

Increased Local Sourcing: Successfully increased the percentage of local sourcing for raw materials and packaging, leading to a 20% reduction in procurement costs and improved supply chain resilience.

Supplier Development Program: Implemented a supplier development program that improved the capabilities of local suppliers, resulting in a 32% increase in the quality and reliability of locally sourced materials.

Cost Savings: Achieved significant cost savings through effective third-party management and localization strategies, contributing to Unilever Nigeria's overall cost reduction targets.

Regulatory Compliance: Ensured 100% compliance with local regulations and industry standards, avoiding potential legal issues and enhancing Unilever's reputation in the local market.

UNILEVER. | Production and process improvement manager - Ora Care

| Jan. 2021 – Aug 2023 |

Key Responsibilities:

Strategic Production Oversight: Direct and manage day-to-day production operations, overseeing both processing and packaging activities. Ensure alignment with company objectives, production schedules, and customer demands.

Process Optimization: Lead initiatives to enhance efficiency, reduce waste, and streamline production processes. Implement lean manufacturing principles and continuous improvement methodologies to achieve operational excellence.

Quality Assurance: Establish and maintain rigorous quality control measures to uphold product quality standards. Implement protocols for inspection, testing, and compliance with regulatory requirements.

Cost Management: Develop and execute strategies to optimize production costs while maintaining high standards of product quality and customer satisfaction. Conduct cost-benefit analyses and identify opportunities for cost reduction and efficiency improvements.

Maintenance Programs: Deploy and sustain autonomous maintenance programs to maximize equipment reliability and minimize downtime. Collaborate with maintenance teams to schedule preventive maintenance and ensure equipment availability.

Performance Metrics: Define and monitor key performance indicators (KPIs) to track production efficiency, quality metrics, and cost performance. Analyze data to identify trends, address issues, and drive continuous improvement.

Team Leadership: Provide leadership and guidance to production teams, fostering a culture of accountability, collaboration, and continuous learning. Conduct regular performance evaluations, provide feedback, and support employee development initiatives.

Key Achievements:

Cost Reduction: Achieved a 25% reduction in production costs through the implementation of cost-saving initiatives and process optimization strategies.

Efficiency Improvements: Increased operational efficiency by 35% through the adoption of lean manufacturing principles and continuous improvement projects.

Key Responsibilities:

- Coordinating all production activities including production and materials planning, line loading and scheduling for the shift.
- Implementation of best-proven practice in the factory viz effective Team working, 5s /Good House Keeping, Autonomous Maintenance, effective Maintenance, Focus Improvement and Safety.

Key Achievements:

- Ensure production, reconciliation, and inventory documents are completed neatly and accurately Improved Shift performance by 25%
- Supervised 45 direct reports, increasing staff accountability by over 25%. Reduction of minor stoppage by 20% in 2019
- Perform quality checks on line. Understand and implement quality concepts and controls as related to specific equipment and processes. Locate, understand, and apply Standard Operating Procedures and One Point Lessons. Write and train other team members on SOPs and OPLs.
- Improves operations, direction of Team Members and compliance within the scope of an assigned shift.
- Sets an example for Team Members by working hard to implement shift plan and ensure smooth production. Motivates Team Members to comply with loss control procedures and maintain a safe and secure environment

Unilever Nigeria Plc. | Technical Operative - Oral Care

| May 2012 – Dec 2017 |

Key Responsibilities:

- Operate production equipment, troubleshoot process faults, and make required adjustments to ensure quality and efficiency.
- Lead effective and safe changeover, start-up, and shutdown of all equipment in assigned work area.
- Perform routine cleaning, lubrication, and basic maintenance of equipment. Develop, maintain, and follow cleaning, lubrication, and inspection standards.
- Understand WCM principles and demonstrate a commitment to those principles. Lead WCM small group activities including development of necessary documents to complete AM Steps and participating in presentations for step audits.
- Direct and train new teammates.
- Collect data as needed to calculate OEE and determine major and minor losses.
- Submit focused improvement ideas and participate in improvement activities using EWO,5-Why analysis, and other problem-solving techniques.
- Understand interaction of equipment and systems, identify equipment abnormalities, monitor equipment condition to improve outputs, interpret data (charts, OEE),identify problems (5-Why Analyses review), and formulate proper decisions
- Demonstrate a personal commitment to plant safety procedures. Work in a safe manner. Follow LOTO procedures. Communicate unsafe conditions to appropriate personnel.
- Demonstrate a personal commitment to housekeeping standards. Ensure work area is kept neat and orderly. Understand and follow 5S process.

PROFESSIONAL WORK EXPERIENCE Continued...**SLLOYD Nigeria | Location - (Friesland Campina Plc) (WAMCO) | Machine Operator**

|Jan 2009– May2012|

Key Responsibilities:

- Perform routine cleaning, lubrication, and basic maintenance of equipment. Develop, maintain, and follow cleaning, lubrication, and inspection standards.
- Understand WCM principles and demonstrate a commitment to those principles.
- Lead WCM small group activities including development of necessary documents to complete AM Steps and participating in presentations for step audits.

Key Responsibilities:

- PM and Corrective Maintenance
- Repair of refrigeration and air condition
- Maintenance of Water Pumps,
- Maintenance of pipe, and Leakage Control.
